

Please do not introduce the new broadcast service known as Low Power FM. This will take priority over stations that have currently existed for years on FM translators. By forcing LPFM, current translators could be forced off the air since LPFM will be given priority. This is wrong. K-LOVE is one station that will be affected. Millions of people have listened to this station for almost two decades. The local community in my area relies on K-LOVE for the best in contemporary Christian music and for news updates and world events. K-LOVE has a major impact on hundreds in my area by giving us a choice of stations to listen to. Without K-LOVE, we would be left with no choice.
